BUTTER is distinctively BTS, with a dynamic groove, crystal clear vocals and a charging beat.

BTS waste no time drawing us in with their second fully English single. It's like a classic Prince song married Justin Timberlake's "Can't Stop the Feeling". The record moves along with soaring synths that build to the chorus hook, which inspire visions of a perfect, hot summer night. I believe this song in particular will further help BTS capture an adult audience that may still have looked upon KPOP as a novelty. KPOP continues to cement itself as a world leader in music, which is why I'm so passionate about this opportunity to become an A&R representative for HYBE.
