BTS

Current concept review: 'BE'

Three words: Limitless, timeless, comforting. A beautiful way to highlight a worldwide struggle with Covid-19 through song writing and music.

What stuck me about this concept and album was the authentic emotion it gave me. It took me on a journey of joy and pain. The 8 tracks almost feel like one story with the neutral raw bass lines, complemented by the high production samples. "Dis-ease" and "Fly To My Room" stand out to highlight the multi-genre talents of the group. "Dis-ease" the Hip-Hop track lead by J-hope, Suga and RM was natural and energetic. This contrasts with "Fly To My Room" with its retro pop vibes utilizing the 70/80's style keyboard riff - executed perfectly by Jimin, J-hope, V and Suga. Vocal production was effortless and seamless. Overall, I think these tracks will have a impactful and long life, perhaps way beyond many of their previous released tracks.

The concept was perfect for this unprecedented time, coming across as the most relatable I have ever seen BTS.
