

FOR IMMEDIATE RELEASE April 18th 2019.  
Los Angeles, CA.

\*Scottish and Australian creative duo release the beautiful duet "5 Minutes" originally pitched for the soundtrack of "A Star is Born".

Cameron Neilson and Sarah C narrowly missed worldwide exposure several times with a song they wrote over 2 years ago. As is the story with many songs but not often talked about, this one was heavily pitched to several major artists and notably most recently for the hit movie "A Star is Born". These many 'near misses' ignited a conversation on Instagram about the duo releasing their own version. Although on opposite sides of the world with Sarah in Melbourne and Cameron in LA, Sarah said "we catch up over Instagram DM's a lot and we just decided no more waiting for other people to cut our song or make it famous".

Cameron adds "after coming so close so many times we decided that in a very independent music world coupled with my background in Music Management we would set the date, release and wait and see what happens, we both have been singers before we could talk" .

The pair admit it would have been a dream to hear Lady Gaga and Bradley Cooper sing it and that it was indeed Lady GaGa's Oscar speech that propelled them forward to launch this project. The song was born from a break up, and the fact that not even 5 minutes more would save what was never meant to be in the first place. Which also relates full circle to not waiting a second longer to release it. Their gravelly, raw vocals complement each other perfectly.

Sarah C lives in Melbourne and is a talented singer and songwriter her EP "Fearless" debuted at number three on the Australian R&B/Soul Charts. Cameron Neilson is an all round creative , a singer from birth, writing singles for America's got talent Brian Justin Crum, with upcoming songs on deadmau5's label . Also now managing and creative developing LA based artists with the company 'Band Of Others' In a world where music is evolving at a rapid rate these two are testimony to having an idea and executing it, with the passion of sharing their music, with a wider audience. Maybe the creative pair just gave themselves their own 'Big Break'?!
